Captures...**

# RECONNAISSANCE BLIND CHESS

Black chooses sense region e3

# RECONNAISSANCE BLIND CHESS

Information gained  
from sense

# RECONNAISSANCE BLIND CHESS

Black plays e7e5

# RECONNAISSANCE BLIND CHESS

Black chooses sense region c2

# RECONNAISSANCE BLIND CHESS

No new information  
gained from sense!

# RECONNAISSANCE BLIND CHESS

Where should Black  
move next?

What would you play?

# RECONNAISSANCE BLIND CHESS

Given current history:

**sense** e3,

**observe** Pe4,

**move** e7e5,

**sense** c2,

**observe** no new information

# RBC IS HARD.

$10^{68}$  **opponent histories aliased** into agent's information set

Number of decision points —  $10^{139}$  **information sets**

Average **game horizon** of 50-60, can go into 100s

**Private** versus public/shared information:

Almost all information in RBC is private
