

SYNOPSIS

Name of the Candidate	Your Name
SR Number	1234-5678-91011
Title of the Thesis	Title of Your Thesis
Research Supervisor	Prof. Your Professor
Degree Registered	Doctor of Philosophy
Department	Computer Science and Automation
Institute	Indian Institute of Science, Bangalore

1 Introduction

You can organize your synopsis in any way you want. As far as I know, there is no fixed template. However, you need to introduce the problem that you addressed with a few motivating examples, and then the following section should be the contributions you made, followed by the chapter-wise details of the thesis. You can cite your own papers as well as the ones that are very relevant for your thesis. Do not put all the references that you have in the thesis. A typical length for a synopsis is 10 pages for PhD, and perhaps 5 pages for MSc. Again, I am not sure if there is any standard for the length of the synopsis. Just make sure it is not too long.

2 Contributions of the Thesis

This thesis considers three related problem domains in crowdsourcing as given in Figure (feel free to put a figure to explain the problems). In the following, we discuss our major findings and summarize our contributions to the space of crowdsourcing mechanisms.

2.1 Problem 1

Say how you solved it.

2.2 Problem 2

Same here.

2.3 Problem 3

Do not stretch beyond what you have done in the thesis ☺

3 Outline of the Thesis

In this section, we provide a brief description of each chapter of the thesis.

Chapter 1: Introduction

A brief overview of the chapter.

Chapter 2: Game Theory and Mechanism Design: A Quick Review

:

Chapter 6: Conclusions
